	Q	Sign-	in options							
						Terms	ofuse	Privacy	& cookies	

You will get an overview of the sign-in methods, if nothing has been set yet, this will be shown on the screen.

Via the option 'Add sign-in method' you can add different methods.

The preferred method is the 'Authenticator

App'. If you choose this method, you will see a link where you can download the App for Android and iOS.

https://aka.ms/getMicrosoftAuthenticator

Alternatively, you can use a different authenticator App via the link at the bottom of the pop-up.

A	Add a method		
W	hich method would you like to add?		
(Choose a method	\sim	
	Authenticator app		
	Phone		
	Alternate phone		
:	Security key		
	Office phone	_	

Download and install the App on your smartphone

On your phone: Start the app, and press the "Add account" button (if that's not available, use the "+" icon on the top of the App) and then select 'Work or school account'.

\leftarrow Add accou	int
What kind of account ar	e you adding?
Personal acco	ount (j
Work or schoo	ol account (j
Other account Facebook, etc	(Google, i)

Then choose the option 'Scan a QR Code'".

In your browser: Continue the wizard to add your account to the Authenticator App until the QR code appears.

Microsoft	Authenticator	<
	Set up your account If prompted, allow notifications. Then add an account, and select "Work or school".	
	Back Next	

On your phone: scan the QR code, and check whether the account has been added to the app.

In your browser: Follow the wizard, and confirm via your phone that you want to log in

Microsoft Authenticator		×
Notification approved		
	Back	Next

Close the wizard and check that the App is visible in your login methods.

We strongly advise to also setup SMS-based authentication as a fallback mechanism. Should the Authenticator App fail to work (new phone, ...), you can use SMS based authentication instead.

The different steps are shown briefly below.
